# iT's Tissue. It's not conventional.

**iT's** *tissue!*

THE ITALIAN  
TECHNOLOGY  
EXPERIENCE

---

**25 - 29 June 2018 ITALY**

Lucca | Bologna | Reggio Emilia | Lecco

# iT's Tissue

## sessions and times.

iT's Tissue is a journey  
through technological  
excellence Made in Italy.

A unique opportunity to meet the 12 Italian companies  
which are leaders of the entire tissue supply chain.

A chance to see technological innovations first-hand  
and discover the most current market trends.

iT's Tissue warmly welcomes you!

# iT's Tissue open houses.

The awe-inspiring evolution of A.Celli. A new generation of iDEAL® and E-WIND® products. A new interpretation of the smart factory.

Integrated solutions for logistics automation – from incoming raw materials, through palletizing, to truck loading – to ensure efficiency, maximum flexibility, safety and full product traceability.

From MYPERINI to Constellation: the road towards Digital Tissue™. The future of tissue today.

Discover Futura's Industry 4.0-integrated research and development converting line as it demonstrates new standards of automation and an innovative service portfolio.

AirMill, a stunning breakthrough in embossing that brings a part of the paper mill process into the converting line improving paper characteristics in terms of bulk, strength, softness, absorbency and stability.

Two interfolding Lines for the production of V-folded Hand Towels and Facial Tissue Products. Come and see with your own eyes. Experience innovation and high-level technology.

New innovative solutions for napkins and other folded disposable products converting lines, among which the digital printing and a new machine for interfolded products.

A roll that after attentive research has finally become a reality. A concept of primary and secondary packaging. These are the company's benchmarks summed up in a new term: Carevolution – "We've got the Real Tissue Solution".

Pulsar Engineering's continuous research for product and process innovation supports customers with even smarter solutions to face the constant changing needs of the industry. The Quatis family and the latest developed machines for AFH rolls and folded products represent the exact fulfilment of this aim.

Discover the GREEN EASY CRESCENT: a revolutionary plant with low energy consumption and minimum environmental impact!

We always look for data. But are we sure that collecting lots of data is enough? The true answer is DNA MAP: an open and multimedia platform that collects raw data translating them into meaningful and valuable information, providing a prioritized action list.

Where is the tissue industry headed? Come and find out with the NowNext experience, a journey into the Toscotec of today and tomorrow. The future of services, TADVISION® innovation, machine evolution. Are you ready to head off with us?
